

Estate leads in environment

HARRINGTON Grove has continued to make a name for itself as an environmental leader.

The estate has more than 280ha of land preserved in its natural state and several environmental initiatives, extensive conservation and rejuvenation work has been carried out.

More than 250,000 new plants and trees have been planted and the on-site nursery is nurturing plants that are ordinarily difficult to grow.

Work on the estate includes extensive weed control, creek bed stabilisation and work on the prevention of soil erosion.

Harrington Grove residents will also be among the first to enjoy the fastest internet in Australia as a Telstra Smart Community.

The estate also offers a country club with tennis courts, a 25m pool and a gym.

The estate was one of six finalists in the recent Urban Development Institute of Australia NSW Awards for Excellence 2009.

The Harrington Grove display village for its second stage will open early next year. For any building or sales inquiries, visit harringtongrove.com.au or phone 4631 3200.
